

How to apply

Post-doctoral Researchers and PhD Students

Applications are welcome at any time from prospective PhD students and Post-doctoral researchers. You should typically apply at least 6-12 months in advance of when you would ideally like to start. Although internal funding may be available to support positions, all applicants are encouraged to seek external sources of funding.

Please send - as a single PDF file - a cover letter describing why you are interested in joining our group, a CV (potential PhD students should include their Bachelors/Masters grades; post-docs should list their scientific publications) and contact details for 2 or more referees to tom@badenlab.org.

Master's students & Undergraduates

MSc projects and undergraduate internships projects may be available at any time. Please send enquiries to tom@badenlab.org. Explain clearly both your background and what type of project you might be interested in.

Applications that fail to adhere to this basic format will be ignored.
